

## **Better palliative care services for people with intellectual disability**

We are doing a project about **palliative care** for people with intellectual disability.

**Palliative care** is help for people who have a serious health issue that they will die from.

We want to make palliative care services better for people with intellectual disability.

## Why are we doing this project

People with intellectual disability do not always get good palliative care.

Many palliative care services do not know how to support people with intellectual disability.

## What we are doing in the project

We have done **research** about how people with intellectual disability get support in palliative care.

**Research** means we look into an issue to find out more about it.

This research helped us know what people with intellectual disability need in palliative care.

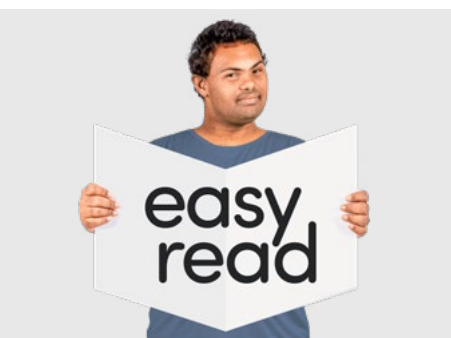

We have made information for palliative care services to help them be better.

We worked together with people with intellectual disability to make the information.

The information says how to support people with intellectual disability in palliative care.

A lot of the information is in Easy Read.

## About this information

National Centre of Excellence in Intellectual Disability Health made this information.

Go to [www.nceidh.org.au](http://www.nceidh.org.au)

CID made this information Easy Read in February 2025.

CID is part of the National Centre of Excellence in Intellectual Disability Health **consortium**.

A **consortium** is a group of organisations that work together to get a goal.
