

Making disability research better

We are doing a project to make **research** about disability better.

Research means people look into an issue to find out more about it.

The **National Disability Research Partnership** does most of the research about disability.

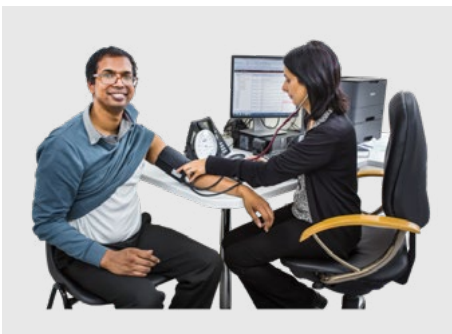

We will say **NDRP** for short

The NDRP has looked how how people can do good research about disability.

Our project will use the research the NDRP has already done.

We will look more at how to do good research about intellectual disability and health.

What we are doing in the project

We will look at what people need to do good research about intellectual disability health.

This might be that people need the right

- Skills
- Information.

We will make a plan for people to do good research about intellectual disability and health.

We will check that all the things in the plan happen.

About this information

National Centre of Excellence in Intellectual Disability Health made this information.
