

## Knowledge Exchange Hub

We are making an online **Knowledge Exchange Hub**.

We will say **hub** for short.

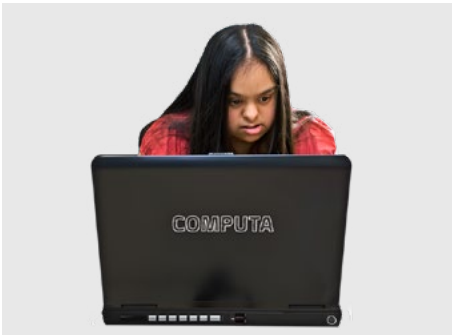

The hub will be an online place where people can

- Talk about health
- Share information about health.

We want to make the hub **accessible** for people with intellectual disability.

**Accessible** means people with disability can use it.

We will **co design** the hub to make sure it is accessible.

**Co design** means people with disability and people without disability work together.

We will do co design with

- People with intellectual disability

- Families and supporters

- Health workers

- People who know a lot about health.

This will help us make sure that all different kinds of people can use the hub.

# Why are we doing this project

We want people to be able to talk to each other about health.

We want people with intellectual disability to be able to find what they need for their health.

This will help make their health better.

## About this information

National Centre of Excellence in Intellectual Disability Health made this information.
