

Mental health for parents with intellectual disability

We are doing a research project about **mental health** for parents with intellectual disability.

Mental health is about how you think and feel.

We want to make mental health care better for parents with intellectual disability.

What we are doing in the project

Parents with intellectual disability do not always get good mental health care.

Many mental health services do not know how to support parents with intellectual disability.

We will do **research** about mental health for parents with intellectual disability in NSW.

Research means we look into an issue to find out more about it.

We will use what we find to help people learn more about mental health for parents with intellectual disability.

We will make information for people with intellectual disability.

We will make information for doctors.

We will make this information with people who have intellectual disability.
