

## Co design about what to research

We are doing a project to find what health **research** the Centre should do.

**Research** means we look into something to find out more about it.

We want to do research to look into the health of people with intellectual disability.

We will **co design** everything we do in this project.

**Co design** means people with disability and people without disability work together.

# What we will do in the project

There are lots of ideas on how to make the health of people with intellectual disability better.

We want to work with people with intellectual disability to find out

- What we need to do research about
- What research to do first.

We will work with people with intellectual disability who already do research.

We will also talk with people with intellectual disability who have not done research.

We will ask them what they think.

We will make a list of the most important things to research about intellectual disability health.

We will share this list with other people who do research in Australia.

## About this information

National Centre of Excellence in Intellectual Disability Health made this information.
