# Innovation seed funding grants

We are doing a project to give **grants** to organisations.

**Grants** are money that organisations can use for a project.

Our grants are called **innovation seed funding grants**.

The grants are to support projects that

- Make health care better for people with intellectual disability
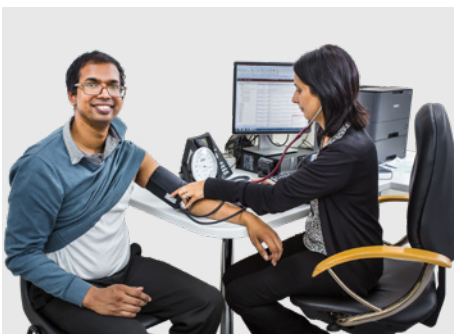

- Have people with intellectual disability take part

- Get organisations to work together.

# Why are we doing this project

The grants are a great way to support other organisations we work with.

We want to work together to give people with intellectual disability better health care.

People with intellectual disability can live healthier lives when they get better health care.
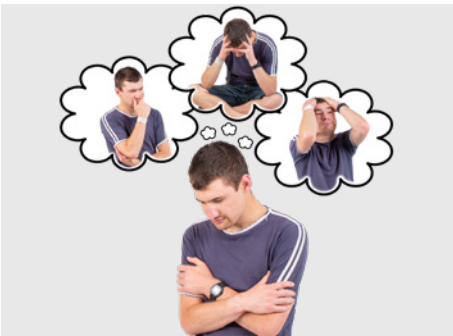

# What we are doing in the project

This year we would like to give our grants to projects that do things from 4 areas.

Area 1 is about **mental health** and intellectual disability.

**Mental health** is about how we think and feel.

Area 2 is about everyday health care that stops people getting sick.

Area 3 is for new ideas about how to give health care.

Area 4 is about better **care pathways**.

**Care pathways** are plans to help people get the right health care and support.

# About this information

National Centre of Excellence in Intellectual Disability Health made this information.
