

Webinars and podcasts for health workers

We are doing a project that makes **webinars** and **podcasts** for health workers.

Webinars are online courses you can join to learn new things.

Podcasts are when you listen to people talk online about an issue.

The webinars and podcasts will teach health workers about intellectual disability.

They will be on important issues about intellectual disability health.

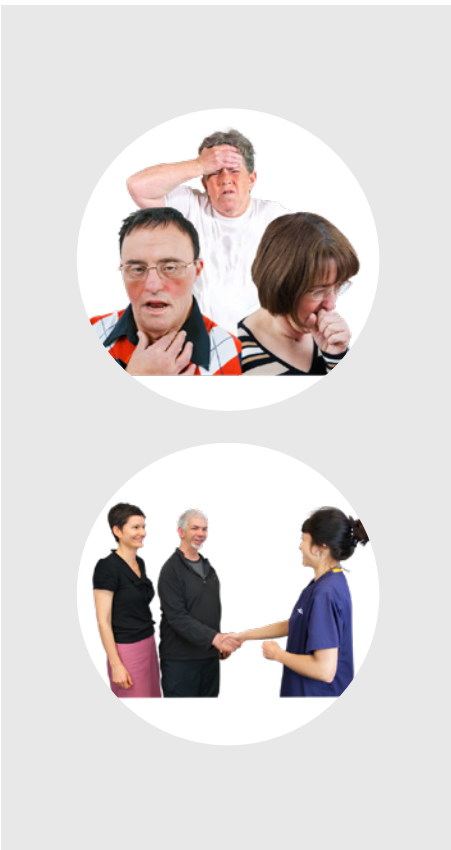

This will support health staff to give better care to people with intellectual disability.

Why are we doing this project

We know some health workers have not learned much about intellectual disability.

We want to give them information about

- Health issues for people with intellectual disability
- How to support people with intellectual disability well.

This will help people with intellectual disability get better health care.

About this information

National Centre of Excellence in Intellectual Disability Health made this information.
