

Welcome to the National Centre of Excellence in Intellectual Disability Health

This information is about the
**National Centre of Excellence in
Intellectual Disability Health.**

We call it **the Centre** for short.

What the Centre does

The Centre makes sure people with intellectual disability get better health care.

To help us do this we

- Listen to people with intellectual disability and their families

- Look at **research** and **data**.

Research is looking up information to find answers to questions in a planned way.

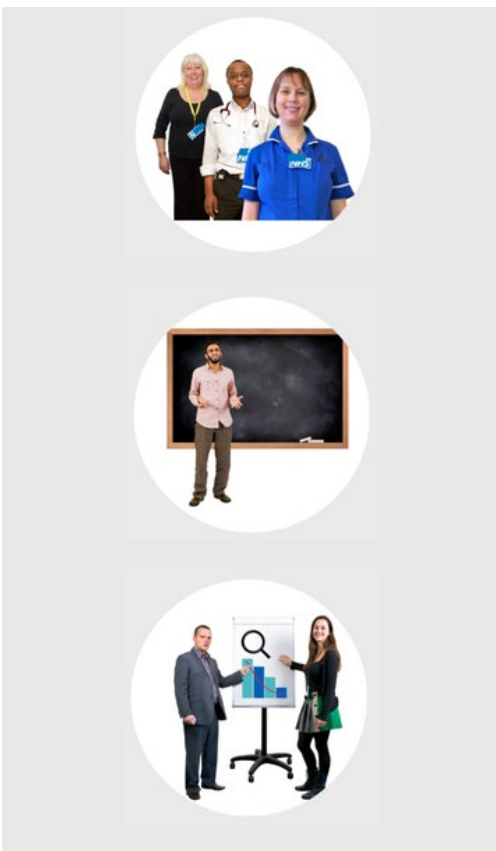

Data is information that is collected so it can be looked at and used to make decisions.

We use what we learn to make **resources**.

Resources are instructions that help you do something.

We share the resources with

- Health and disability workers
- People who teach others about intellectual disability
- Researchers

So they know how to help people with intellectual disability get better health care.
